Profile

Dynamic Front-End Developer Intern with hands-on experience in web development and foundation in **HTML, CSS, JavaScript, and React**. Built and deployed a full-stack **Medical Reminder** Web App using **Firebase Hosting & Cloud Messaging**, enabling real-time push notifications to users across mobile and desktop platforms. Proven ability to enhance user experiences through responsive design and effective problem-solving. Adept at working with cross-functional teams to optimize functionality and UI/UX. Quick to learn new technologies, committed to delivering high-quality, innovative digital solutions.

Education

Bachelor of Computer Applications, Christ University

April 2023

ST MARY’S SCHOOL

March 2023

Internships

Front End Developer Intern,
Mainflow Main Flow Services and Technologies Pvt. Ltd, Ghaziabad

May 2024 – July 2025

- Developed responsive web applications using HTML, CSS, and JavaScript to enhance user experience.
- Optimized front-end designs for improved functionality and visual appeal.
- Utilized Visual Studio Code (VSCode) to streamline workflows and ensure timely project completion.
- Applied theoretical concepts effectively to practical tasks, boosting technical proficiency.
- Collaborated with cross-functional teams to address code issues, increasing project efficiency.
- Facilitated knowledge-sharing and troubleshooting sessions to support team members.
- Navigated technical challenges through targeted practice and problem-solving sessions.
- Expanded technical skills by engaging with diverse software tools.

Front End Developer Intern,
Gudmed, Gurgaon

May 2025 – July 2025

- Built a responsive **medical reminder web application** using React.js, tailored for users to schedule and track daily medicine intake.
- Integrated **Firebase Authentication** for secure login/signup and **Firebase Realtime Database** to manage user-specific medication schedules.
- Implemented **real-time push notifications** using **Firebase Cloud Messaging (FCM)** to alert users on mobile/desktop about upcoming doses based on personalized time schedules.
- Developed settings dashboard with **toggle controls** for enabling/disabling notifications (push, desktop, email), using React state management.
- Configured **Firebase Hosting with GitHub Actions** for CI/CD deployment pipeline and automated hosting of the web app.
