PROFESSIONAL SUMMARY

Technology graduate with a strong foundation in **Python, SQL, and Excel**, aiming to advance into data-focused analytical roles. Builds on front-end development experience to perform **data analysis, reporting, and visualization**, transforming insights into measurable business outcomes and efficiency improvements.

SKILLS

Data Analytics:

- Python (Pandas, NumPy, Matplotlib)
- SQL
- Excel
- Power BI (basic)
- Tableau (basic)

Technical Tools:

- MySQL
- Git
- HTML/CSS (basic)
- Problem Solving

WORK EXPERIENCE

Gudmed — Front-End Developer Intern

Gurgaon | May 2025 – July 2025

- Built a medical reminder web app using React.js to record and visualize daily medicine intake for 100+ test users.
- Integrated Firebase Realtime Database to manage and analyze structured user medication data with zero-error synchronization.
- Designed UI components that improved load speed by 30% and delivered real-time notifications using FCM.
- Collaborated with a 4-member team to enhance engagement tracking and app reliability by ~20%.

Main Flow Services and Technologies Pvt. Ltd — Front-End Developer Intern

Ghaziabad | May 2024 – July 2024

- Developed responsive web pages using HTML, CSS, and JavaScript, improving page load speed by ~20% and enhancing user interaction.
- Used debugging and testing tools (Chrome DevTools, Lighthouse) to analyze performance metrics, improving efficiency by 15%.
- Collaborated with a 5-member backend team to ensure seamless data integration and UI consistency.
- Strengthened reasoning and problem-solving skills through 3+ live project components.

EDUCATION

Christ University — Bachelor of Computer Applications

Bangalore | Apr 2023 – Present | GPA: 3.4/4.0

St. Mary's School — Secondary Education

Mar 2023

PROJECTS

Retail Consumer Behavior Analysis

- Executed a full-stack data analytics project combining **Python, SQL, and Power BI** to analyze customer shopping behavior for a retail company.
- Cleaned and transformed raw transactional data using Python (pandas, NumPy) for accurate analysis and modeling.
- Built relational database schemas in MySQL and executed analytical queries to uncover patterns in customer loyalty, sales channels, and purchase drivers.
- Developed an interactive **Power BI dashboard** visualizing sales trends, demographics, and payment preferences, enabling data-driven decision-making.
- Derived actionable insights and recommendations to optimize marketing strategies and improve customer retention.
- Published all scripts, SQL queries, and reports in a structured **GitHub repository** for transparent documentation.

End-to-End SQL Analysis

- Developed a 3-table relational database (~2,000 records) using SQL DDL/DML with proper keys and constraints.
- Cleaned and standardized data across 8+ columns ensuring consistency.
- Executed 25+ analytical queries using JOINs, CTEs, and window functions to derive key business insights.
- Created Excel/Power BI views, reducing manual reporting by ~30%.

CERTIFICATES

- Data Analytics (Self-Learning, Ongoing) — Top Varsity
- Introduction to Python — Infosys Springboard, Aug 2024
- Web Development Internship — Main Flow Services, 2024
- Computer Network — Huawei Talent, Jan 2025
- SQL: Basic to Advanced Skills for Analysts & Engineers — Udemy, Oct 2025
